

Bar Graph Dance

Take 5 steps right, the x-axis is out of sight
Independent variable, it goes here to make things right
Take 5 steps back, the intersect is where you're at
Cross your feet and spin, now you're at the origin

Chorus:

The Bar Graph Dance, organize your information
Bar Graph Dance, It will help your communication
The Bar Graph Dance, organize your information
Bar Graph Dance, It will help your communication

Take 5 steps straight up, it's the y-axis so take a look
The dependent variable, it's the data that you took
Take 5 steps back, each step should be the same
It's your interval, it's how we play the bar graph game

Chorus:

Now back to the top, everyone turn to your right
Don't leave your title out, it tells you what the graph's about
Back to the origin, everyone take another spin
Now you've figured out, what a bar graph is all about

Chorus:
